SAFETY DATA SHEET

SDS ID NO.: 0153MAR019
Revision Date: 05/14/2015

1. IDENTIFICATION

Product Name: Marathon Petroleum Denatured Alcohol
Synonym: Denatured Alcohol, Marathon
Chemical Family: Alcohol
Recommended Use: Fuel additive.
Use Restrictions: All others.

Supplier Name and Address:
MARATHON PETROLEUM COMPANY LP
539 South Main Street
Findlay, OH 45840

SDS information: 1-419-421-3070
Emergency Telephone: 1-877-627-5463

2. HAZARD IDENTIFICATION

Classification

OSHA Regulatory Status
This chemical is considered hazardous according to the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)

<table>

Hazards Not Otherwise Classified (HNOC)
Not applicable

Label elements

EMERGENCY OVERVIEW

Danger

HIGHLY FLAMMABLE LIQUID AND VAPOR
Causes serious eye irritation
May cause genetic defects
May cause cancer
Suspected of damaging fertility or the unborn child
Harmful to aquatic life with long lasting effects

Appearance Colorless Liquid
Physical State Liquid
Odor Very faint. Alcoholic

Precautionary Statements - Prevention
Obtain special instructions before use
Do not handle until all safety precautions have been read and understood
Keep away from heat/sparks/open flames/hot surfaces. — No smoking
Keep container tightly closed
Ground/bond container and receiving equipment
Use explosion-proof electrical/ventilating/lighting/equipment
Use only non-sparking tools
Take precautionary measures against static discharge
Wash hands and any possibly exposed skin thoroughly after handling
Wear protective gloves/protective clothing/eye protection/face protection
Avoid release to the environment

Precautionary Statements - Response
IF exposed or concerned: Get medical attention
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing
IF eye irritation persists: Get medical attention
IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower

Precautionary Statements - Storage
Store in a well-ventilated place. Keep cool
Store locked up

Precautionary Statements - Disposal
Dispose of contents/container at an approved waste disposal plant

3. COMPOSITION/INFORMATION ON INGREDIENTS

Denatured Alcohol is a mixture of ethyl alcohol and natural gasoline that is approved for use as an octane-enhancing blending component in gasoline.

Composition Information:

<table>
<thead>
<tr>

4. FIRST AID MEASURES

First Aid Measures

In case of accident or if you feel unwell, seek medical advice immediately (show directions for use or safety data sheet if possible).

Inhalation: Remove to fresh air. If not breathing, institute rescue breathing. If breathing is difficult, ensure airway is clear, give oxygen and continue to monitor. If heart has stopped, immediately begin cardiopulmonary resuscitation (CPR). Keep affected person warm and at rest. Get medical attention if cough or other respiratory symptoms develop.
Skin Contact: Immediately wash exposed skin with plenty of soap and water while removing contaminated clothing and shoes. Get medical attention if irritation persists. Place contaminated clothing in closed container until cleaned or discarded. If clothing is to be laundered, inform the person performing the operation of contaminant's hazardous properties.

Eye Contact: Flush immediately with large amounts of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Gently remove contacts while flushing. GET IMMEDIATE MEDICAL ATTENTION.

Ingestion: Do not induce vomiting. If spontaneous vomiting occurs, keep head below hips, or if patient is lying down, turn body and head to side to prevent aspiration and monitor for breathing difficulty. Never give anything by mouth to an unconscious person. Keep affected person warm and at rest. GET IMMEDIATE MEDICAL ATTENTION.

Most important signs and symptoms, both short-term and delayed with overexposure

Adverse Effects: Acute: May cause severe eye irritation. Symptoms may include stinging, tearing, redness, and swelling. Delayed: Dry skin and possible irritation with repeated or prolonged exposure.

Indication of any immediate medical attention and special treatment needed

NOTES TO PHYSICIAN: INGESTION: Aspiration into lungs may cause chemical pneumonia and lung damage. Treat symptomatically.

5. FIRE-FIGHTING MEASURES

Suitable extinguishing media
For small fires, Class B fire extinguishing media such as CO2, dry chemical, foam (AFFF/ATC) or water spray can be used. For large fires, water spray, fog or foam (AFFF/ATC) can be used. Firefighting should be attempted only by those who are adequately trained and equipped with proper protective equipment.

Unsuitable extinguishing media
Do not use straight water streams to avoid spreading fire.

Specific hazards arising from the chemical
This product has been determined to be a highly flammable liquid per the OSHA Hazard Communication Standard and should be handled accordingly. Vapors may travel along the ground or be moved by ventilation and ignited by many sources such as pilot lights, sparks, electric motors, static discharge, or other ignition sources at locations distant from material handling. Flashback can occur along vapor trail. For additional fire related information, see NFPA 30 or the North American Emergency Response Guide 127.

Hazardous combustion products
Smoke, carbon monoxide, and other products of incomplete combustion.

Explosion data
- Sensitivity to Mechanical Impact: No
- Sensitivity to Static Discharge: Yes

Special protective equipment and precautions for firefighters
Firefighters should wear full protective clothing and positive-pressure self-contained breathing apparatus (SCBA) with a full face-piece, as appropriate. Flame is invisible in daylight. Avoid using straight water streams. Water may be ineffective in extinguishing low flash point fires, but can be used to cool exposed surfaces. Avoid excessive water spray application. Water spray and foam (AFFF/ATC) must be applied carefully to avoid frothing and from as far a distance as possible. Keep run-off water out of sewers and water sources.

NFPA: Health 0  Flammability 0  Instability 0  Special Hazards -

6. ACCIDENTAL RELEASE MEASURES

SDS ID NO.: 0153MAR019  Product name: Marathon Petroleum Denatured Alcohol
**Personal Precautions:**
Keep public away. Isolate and evacuate area. Shut off source if safe to do so. Eliminate all ignition sources.

**Protective Equipment:**
Use personal protection measures as recommended in Section 8.

**Emergency Procedures:**
Advise authorities and National Response Center (800-424-8802) if the product has entered a water course or sewer. Notify local health and pollution control agencies, if appropriate.

**Environmental precautions:**
Avoid release to the environment. Avoid subsoil penetration.

**Methods and materials for containment:**
Contain liquid with sand or soil.

**Methods and materials for cleaning up:**
Use suitable absorbent materials such as vermiculite, sand, or clay to clean up residual liquids. Recover and return free product to proper containers. When recovering free liquids ensure all equipment is grounded and bonded.

### 7. HANDLING AND STORAGE

**Safe Handling Precautions:**
Use appropriate grounding and bonding practices. Do not expose to heat, open flames, strong oxidizers or other sources of ignition. No smoking. Avoid contact with eyes. Avoid repeated and prolonged skin contact. Use personal protection measures as recommended in Section 8. Use only non-sparking tools. Do not cut, drill, grind or weld on empty containers since explosive residues may remain. Refer to applicable EPA, OSHA, NFPA and consistent state and local requirements.

**Storage Conditions:**
Store in properly closed containers that are appropriately labeled and in a cool, well-ventilated area.

**Incompatible materials**
Strong oxidizing agents.

### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

<table>

</tr>
</tbody>
</table>

**Notes:**
The manufacturer has voluntarily elected to provide exposure limits contained in OSHA’s 1989 air contaminants standard in its SDSs, even though certain of those exposure limits were vacated in 1992.

**Engineering measures:**
Local or general exhaust required in an enclosed area or when there is inadequate ventilation. Use mechanical ventilation equipment that is explosion-proof.

**Personal protective equipment**

**Eye protection:**
Where splashing is possible, wear safety glasses with side shields.

**Skin and body protection:**
Use nitrile rubber, viton or PVA gloves for repeated or prolonged skin exposure. Glove suitability is based on workplace conditions and usage. Contact the glove manufacturer for specific advice on glove selection and breakthrough times.

**Respiratory protection:**
Approved organic vapor chemical cartridge or supplied air respirators should be worn when significant vapors are generated. Observe respirator assigned protection factors (APFs) criteria cited in federal OSHA 29 CFR 1910.134. Self-contained breathing apparatus should be used for fire fighting.
9. PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

- Physical State: Liquid
- Appearance: Colorless Liquid
- Color: Colorless
- Odor: Very faint. Alcoholic
- Odor Threshold: No available data.

Property | Values (Method)
--- | ---
Melting Point / Freezing Point | No available data.
Initial Boiling Point / Boiling Range | 74-79.5 °C / 165-175 °F
Flash Point | -20 °C / -5 °F
Evaporation Rate | No available data.
Flammability (solid, gas) | Not applicable.
Flammability Limit in Air (%) | 19 Upper Flammability Limit; 3.3 Lower Flammability Limit
Vapor Pressure | 43-47 mm Hg
Vapor Density | 1.6
 Specific Gravity / Relative Density | 0.79
Water Solubility | Appreciable
Solubility in other solvents | No available data.
Partition Coefficient | 100%
Decomposition temperature: | No available data.
pH: | Not applicable.
Autoignition Temperature | No available data.
Kinematic Viscosity | No available data.
Dynamic Viscosity | No available data.
Explosive Properties | No available data.
Softening Point | No available data.
VOC Content (%) | No available data.
 Density | 6.6 lbs/gal
Bulk Density | Not applicable.

10. STABILITY AND REACTIVITY

Reactivity | The product is non-reactive under normal conditions.
Chemical stability | Stable under recommended storage conditions.
Possibility of hazardous reactions | None under normal processing.
Hazardous polymerization | Will not occur.
Conditions to avoid | Sources of heat or ignition.
Incompatible materials | Strong oxidizing agents.
Hazardous decomposition products | None known under normal conditions of use.

11. TOXICOLOGICAL INFORMATION

Potential short-term adverse effects from overexposures

- Inhalation: Inhalation of high vapor concentrations may cause irritation of the respiratory system.
Eye contact
Irritating to eyes.

Skin contact
Prolonged or repeated contact may dry skin and cause irritation.

Ingestion
May cause irritation of the mouth, throat and gastrointestinal tract. Aspiration into lungs may result in pneumonitis.

Acute Toxicological data

</tbody>
</table>

Delayed and immediate effects as well as chronic effects from short and long-term exposure

ETHANOL: Repeated ingestion of ethanol can result in alcohol abuse, causing behavioral changes, memory loss, impaired judgement, decreased appetite, irregular heartbeats, and decreased fertility. Prolonged and repeated ingestion of ethanol has also been associated with cancers of the mouth, pharynx, esophagus and liver. Ethanol ingestion by pregnant women can cause miscarriage, low birth weight, premature birth and fetal alcohol syndrome. In males, acute and chronic alcohol ingestion may affect gonadal hormone levels. It may also affect the liver, kidney, brain, blood and cardiovascular system.

NAPHTHAS: In a large epidemiological study on over 15,000 employees at several petroleum refineries and amongst residents located near these refineries, no increased risk of kidney cancer was observed in association with gasoline exposures (a similar material). In a similar study, no increased risk of kidney cancer was observed among petroleum refinery workers, but there was a slight trend in the incidence of kidney cancers among service station employees, especially after a 30-year latency period.

ISOPARAFFINS: Studies in laboratory animals have shown that long-term exposure to similar materials (isoparaffins) can cause kidney damage and kidney cancer in male laboratory rats. However, in-depth research indicates that these findings are unique to the male rat, and that these effects are not relevant to humans.

Adverse effects related to the physical, chemical and toxicological characteristics

Signs & Symptoms
Eye irritation may result from contact with the liquid or exposure to vapor. Repeated or prolonged skin contact may cause drying, reddening, itching and cracking.

Sensitization
Not expected to be a skin or respiratory sensitizer.

Mutagenic effects
May cause genetic defects.

Carcinogenicity
Cancer designations are listed in the table below.

<table>
<thead>
<tr>
<th>Name</th>
<th>ACGIH (Class)</th>
<th>IARC (Class)</th>
<th>NTP</th>
<th>OSHA</th>
</tr>
</thead>
<tbody>

</table>

Reproductive toxicity
Suspected of damaging fertility or the unborn child.

Specific Target Organ Toxicity (STOT) - single exposure
Not classified.

Specific Target Organ Toxicity (STOT) - repeated exposure
Not classified.
Aspiration hazard: Potential for aspiration if swallowed.

12. ECOLOGICAL INFORMATION

Ecotoxicity: This product should be considered harmful to aquatic organisms, with the potential to cause long lasting adverse effects in the aquatic environment.

<table>

</tr>
</tbody>
</table>

Persistence and degradability: Readily biodegradable in the environment. The presence of ethanol in this product may impede the biodegradation of benzene, toluene, ethylbenzene and xylene in groundwater, resulting in elongated plumes of these constituents.

Bioaccumulation: Not expected to bioaccumulate in aquatic organisms.

Mobility in soil: May partition into air, soil and water.

Other adverse effects: No information available.

13. DISPOSAL CONSIDERATIONS

Description of Waste Residues: This material may be a flammable liquid waste.

Safe Handling of Wastes: Handle in accordance with applicable local, state, and federal regulations. Use personal protection measures as required. Use appropriate grounding and bonding practices. Use only non-sparking tools. Do not expose to heat, open flames, strong oxidizers or other sources of ignition. No smoking.

Disposal of Wastes / Methods of Disposal: The user is responsible for determining if any discarded material is a hazardous waste (40 CFR 262.11). Dispose of in accordance with federal, state and local regulations.

Methods of Contaminated Packaging Disposal: Empty containers should be completely drained and then discarded or recycled, if possible. Do not cut, drill, grind or weld on empty containers since explosive residues may be present. Dispose of in accordance with federal, state and local regulations.

14. TRANSPORT INFORMATION

DOT (49 CFR 172.101):
